

# Heavy Vehicle Simulator Evaluation

The AutoSense Mobile Truck Simulator gives you the unique opportunity to evaluate your drivers full driving competency in just 30-minutes. Minimising business interruption while providing safety compliance training.

Evaluations are based on the SAFED style and are customised to suit your company's common driving situations. Driver awareness levels, responses to failures, emergency situations and fuel efficiency are assessed and reported. This provides a clear path towards safe, efficient, low risk and fuel efficient driving practices throughout your fleet. This evaluation is a valuable tool in ensuring your drivers are both fuel efficient and follow safe driving practices.

### What's involved

- A 30-minute simulator practical assessment.
- A company risk profile provide for fleets including corrective actions.
- Assists you to meet new workplace safety regulations including director's duty of care.
