

Safe Driving Policy

Implementing a Safe Driving policy is essential for protecting employees at work. It helps businesses comply with the Health & Safety at Work Act 2015 (HASW) and reduces risks while ensuring vehicle safety and maintenance. [Learn more.](#)

Fleet Driver Training programme

A concise, three-step health and safety based programme designed to reduce driver risk. Using a mix of online, practical evaluation, and coaching, it assesses driver competency, attitudes, behaviour, and risk choices. The programme targets drivers needing practical training, optimising time and resources. Additional Specialist Skills training is available for EVs, hybrids, trailer towing, and 4WD. Learn more. [Learn more.](#)

Simulation Training

Our Heavy Vehicle simulation assessments and coaching, provide the opportunity to evaluate your drivers' full driving competency in just one hour, minimising business interruption while providing safety compliance training. [Learn more.](#)

Guardian by Seeing Machines

World leading technology that prevents driver fatigue and distraction related events in real time. [Learn more.](#)

MiTAC Cameras

MiTAC cameras are leading-edge devices that captures high quality video footage of the road ahead as well as driver facing recording which analyses footage in real-time and help with driver behaviour monitoring and incident investigation. [Learn more.](#)

Fatigue Management Solutions

We offer an Alert at Work seminar on fatigue and sleep, as well as a range of sleep test and treatment options for team members you may have concerns about including CPAP trials and pre-employment sleep apnea screening. [Learn more.](#)
