

# Driving Safety

Information, insights and resources  
to help improve fleet and driver safety

Thanks for your interest in the work we do at AutoSense! This newsletter is designed to provide insights and resources that enhance driver safety for you and your team.

In this edition, we explore **Driver Monitoring Systems** and key considerations for implementing them in your business. As the distributor of **Guardian by Seeing Machines** and **MiTAC**, AutoSense is proud to offer these advanced solutions to enhance driver safety and fleet management.

Our lead article covers what to look for when choosing a DMS, followed by an episode of **The Depot Podcast**, where Greg Murphy speaks with **Dr. Angus McKerral** from Seeing Machines about the continuous improvements to **Guardian**. We also highlight the latest **Driver Drowsiness Attention Warning** upgrade for **Guardian Gen 2**, and feature **Mainfreight Australia's** successful implementation of **MiTAC** across their fleet, showcasing how these systems work together to create a comprehensive safety solution.

We hope you find these insightful!

---

## Choosing the right Driver Monitoring System

In the demanding world of New Zealand transport, where long hours and challenging road conditions are a constant, ensuring driver and freight safety is more than just a priority – it's essential. With the ongoing risks of driver fatigue and distraction, businesses need a solution that goes beyond basic monitoring.

Enter Driver Monitoring Systems (DMS)—designed to track behaviour and intervene when needed. But with many options on the market, how can businesses cut through the clutter to find the DMS that best safeguards their drivers and freight?

Let's explore the key features that truly make a difference.

## The Depot podcast hosted by Greg Murphy

In this episode of The Depot podcast, Greg Murphy talks to Dr Angus McKerral from Seeing Machines. They discuss the role of a Human Factors Research

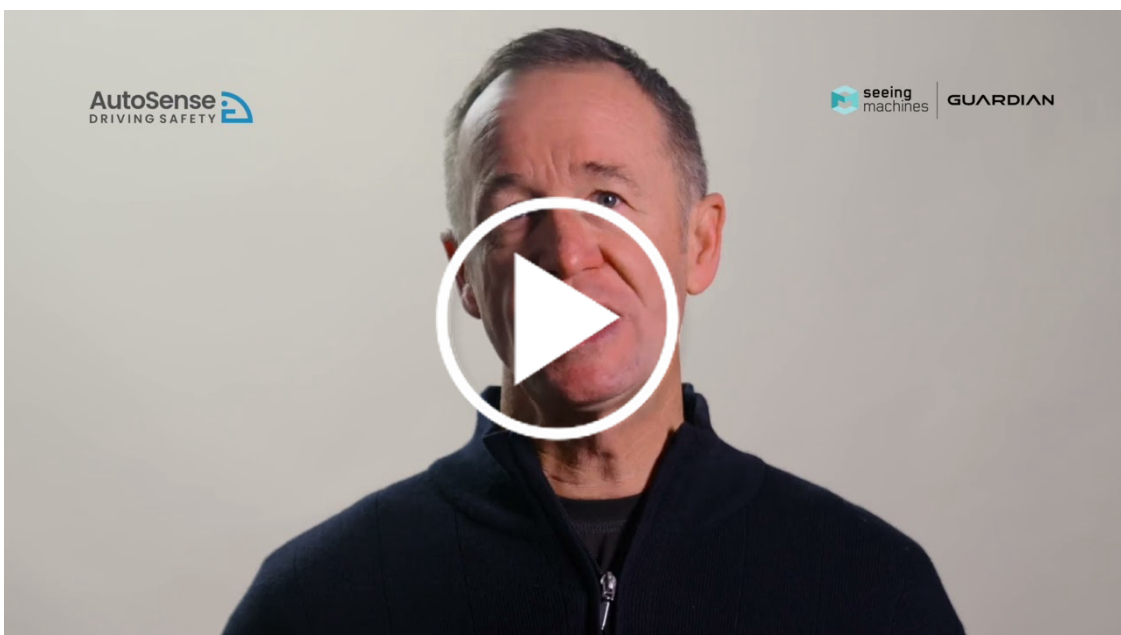

Scientist, explore the evolution and future of **Guardian** by Seeing Machines, discuss key considerations when selecting a **Driver Monitoring System**, and review the regulations shaping the DMS landscape. Watch below on YouTube or listen on [Spotify](#), [Apple](#) or [iHeart](#).

## Guardian sees fatigue coming before your do!

Fatigue is the biggest killer on roads, globally. When a driver is drowsy, or worse has a microsleep, the risk of a fatal event increases significantly as they are simply unable to concentrate on the road ahead.

Guardian Generation 2 by Seeing Machines is setting a new standard in drowsiness detection. Watch the video below to find out how or [click here to learn more.](#)

## MiTAC the perfect compliment to Guardian

We have recently added MiTAC in-cab cameras to the AutoSense portfolio. These forward-facing and driver-facing camera solutions offer powerful **Driver Monitoring** and **Incident Investigation** capabilities. Paired with **Guardian** by

Seeing Machines, MiTAC enhances the ability to monitor driver behaviour, detect risks, and improve safety on the road.

Together, these solutions provide a comprehensive approach to keeping your drivers safer while they're at work, and we're proud to offer them as part of our ongoing commitment to driver safety.
